

UV/LED LAMP MOLLY NAILS Y13

Model: SUN Y13

Certificate No.: XK2205012091C

*Molly
Nails*

TECHNICAL DATA:

Power: 248W

Nominal input: 100-240V 50/60Hz

Nominal output: 12V 1.5A

Number of UV LEDs: 60 pcs

UV wavelength: 365+405 nm

1. SAFETY OF USE:

1. Before use, read the operating instructions carefully.
2. Use only the power supply included in the set - using a power supply incompatible with the device may damage it.
3. Do not allow the device to get wet, flood with water or other liquids, to avoid damage, short circuit or electric shock.
4. Wipe with mild detergent in case of a dirty surface. Perform this operation with the equipment switched off. (unplug the power cord).
5. Do not use the lamp in a damp/wet space or when the air humidity level reaches high values.
6. Do not use the lamp in case of a damaged power cable or timer buttons.
7. The device is intended for indoor use
8. If you do not use the device for a long time, remove the plug from the outlet.
9. Continuous operation of the device should not exceed 600s, as this can shorten the life of the equipment.
10. Please note that making self-switches and changes to your device is prohibited and equivalent to the loss of warranty. The manufacturer does not take responsibility for the correct and safe operation of the device.
11. Do not stare directly at the LEDs to avoid eye damage.
12. KEEP AWAY FROM CHILDREN.

2. THE SET INCLUDES:

- Lamp body
- Power cable
- Removable lamp bottom
- User manual

3. FUNCTION BUTTON CHARACTERIZATION:

1. Motion sensor
2. LCD display
3. Input socket for power cable
4. timer buttons

4. HOW TO USE:

1. Connect the device to the power supply.
2. After turning on the device, set its working time through the timer buttons.
3. You can choose from the 10s/20s/60s/99s (99s Low Heat Mode) timer options available.
4. When the device counts down the set time, you can press the timer button again, the device will reset the time and enter standby mode.
5. The device can also be turned on without the use of timer buttons. Put your hand in the lamp, the motion sensor will automatically start the exposure. The maximum exposure time is 120s.
6. The LCD display shows the remaining working time. When using 10s/30s/60s buttons, the display counts down. When using the 99s button and the infrared sensor, the display counts up.
7. Follow the instructions for curing the product used.
8. After using the lamp, unplug it from the mains.

In accordance with *art. 13 sec. 1 of the Act of 11 September 2015 on used electrical and electronic equipment (Journal of Laws 2015 item 1688)*, we inform you about the correct handling of waste electrical and electronic equipment:

1. It is prohibited to place used electrical and electronic equipment together with other waste - this is confirmed by the marking in the form of a "crossed-out bin", which requires selective collection of this type of waste.
2. Electrical and electronic devices may contain hazardous substances, mixtures and components, which, after entering the environment, may pose a serious threat to the health and life of humans and living organisms.
3. Used electrical and electronic equipment should be transferred only to authorized collection points, the list of which should be included on the website of each Municipal Office.
4. Households play a key role in the waste management system for used electrical and electronic equipment due to the possibility of their direct transfer to authorized collection points and the elimination of undesirable social habits resulting in leaving waste equipment in places not intended for this purpose.
